

Increased Productivity Means More Time to Focus on the Mission

Spanish Peaks Behavioral Health Centers in Pueblo, Colorado, has been treating people who suffer from behavioral health issues for more than fifty years. They do this with the help of Medicaid funding, as they serve everyone who walks in, no matter their age or situation, whether the patient can pay or not. Spanish Peaks provides their local community with crisis intervention, clinicians, addiction and substance abuse treatments, school-based treatment systems and residential units.

To contend with the various financial functions the employees at Spanish Peaks must complete every day, the organization uses Abila MIP Fund Accounting software to keep everything running efficiently.

ABILA MIP FUND ACCOUNTING IS EASY TO USE

One of the best things about MIP Fund Accounting is how easy it is to use, according to Spanish Peaks Chief Financial Officer Paige Burkes. This is just one aspect that sets it apart from the competition. "It's so easy to create reports on the fly and change them up as we need," Burkes explained.

Currently, MIP Fund Accounting software is used at Spanish Peaks to keep track of the General Ledger and complete financial reporting. Moreover, the organization takes advantage of the Billing module.

Since the organization has seen so much improvement to their processes, the Human Resources department is now looking into implementing the Payroll module for their use.

UPARALLELED TIME SAVINGS

Before MIP, Spanish Peaks' staff efforts were spent manually creating reports and mining data because their previous software was difficult to manage and lacked the capability to import data. Since implementing MIP, Spanish Peaks has been able to refocus that time to grow their program.

"With financial reports, it takes me about five minutes in MIP, but it would take me literally months with our

"With financial reports, it takes me about five minutes in MIP, but it would take me literally months with our old system."

old system when I was trying to import two years of information and put it in a usable form," Burkes said. "To me, that is the biggest benefit because I have to produce financials, and I don't want just plain vanilla financials. I need to see analysis and trends."

No matter what type of information is needed, MIP makes obtaining the report faster for Spanish Peaks, allowing them to focus more employee efforts towards organizational goals.

GOING FORWARD TOGETHER

Since Abila has become such an important part of Spanish Peaks’ financial system, the future is bright for the organization. Burkes stated that she and her staff have been able to start new projects and look ahead largely in part of the time and effort saved using MIP Fund Accounting software.

Because of Abila MIP Fund Accounting, Spanish Peaks is able to provide more services to their clients. They

have been able to implement a program to manage money for 170 clients, which includes paying their bills and obtaining Social Security payments.

After leveraging Abila software, Spanish Peaks was able to become much more efficient and better serve their constituents. Plus, Burkes pointed out, Abila was more than willing to accommodate.

“Abila is going above and beyond to make this happen,” she noted. “They’ve been really good to work with.”

BUSINESS NEED	SOLUTION	BENEFITS
Spanish Peaks needed a solution that would help them to reduce staff time spent doing data entry, mining data, and creating reports.	MIP Fund Accounting allows this busy nonprofit to easily manage their General Ledger, quickly create financial reports, import data and manage billing.	Spanish Peaks’ streamlined their fund accounting processes and spend new-found time and attention to programs that manage the finances for 170 patients.
